

**CERTIFICATE OF TEST**

Test certificate n°:  
"IBE-BVI" – CFP-15.018

Date certificate: 04/03/2015

Test samples: Flat elastic bands 'B' quality  
90 mm x 5 mm

Manufacturer: Nico S.A.  
Rue de Coquiamont 7  
1360 Thorembais-les-Béguines - Belgium

Test: Determination of the overall migration as recorded in the European Regulation No 1935/2004, the Belgian legislation RD 11/05/1992 and amendments and the European Regulation No 10/2011 and amendments.

Simulants and test conditions selected following the European Regulation No 10/2011 and amendments, contact method based on EN 1186-1 and EN 1186-3.

used simulants:  
simulant A: 10% (v:v) ethanol

test conditions:  
contact duration: 10 days  
contact temperature: 40°C

Test results: overall migration: < 10 mg/dm<sup>2</sup> for each used simulant      The maximum limit for the overall migration is 10 mg/dm<sup>2</sup> or 60 mg/kg foodstuffs.

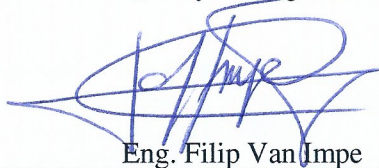

The results show that the delivered tested sample is suitable for long term contact with all aqueous foodstuffs at room temperature or below including heating up to 70 °C for up to 2 hours, or heating up to 100 °C for up to 15 minutes if all monomers and other starting substances used for the manufacturing appear in the positive list (European Regulation No 10/2011 and amendments) and if the specific migration limits aren't exceeded.

The complete description of the presented material, the results and findings of the tests are given in the report CFP-15.018 of the 04/03/2015 which is inextricable to this certificate.

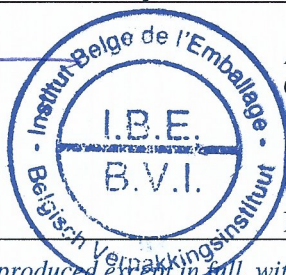

Any change of the presented material involves a new series of conformity tests on the modified material.

**The report and certificate exclusively refers to the tested objects.**
