# Illuminate good times

**Magnetic charging**

Imagine having 30 tables with wireless lamps in your restaurant, and having to plug in every lamp every night for charging. No longer!

With the Securit® Easy Magnetic Charging cable the cable quickly snaps into place and your lamp is charging. That's it! Once charged your lamp is ready to go for 10-20 hours.

**Stageless dimmable**

Every restaurant has its own unique lighting set-up. Which also means that in many cases a standard lamp could be too bright or too dim.

Set the perfect ambiance for any table with the Securit® Stageless Dimmable possibilities.

**Water resistant**

When there are people having fun, drinks get spilled. When there is sunshine, eventually there will be rain. But who wants to worry about that?

The Securit® table top lamps are IP54-rated, which means they are resistant to all but the heaviest rain.

**2-year warranty**

We believe in the quality of our lamp range. To prove that we have given an impressive 2-year warranty on all our lamps.

Quality guaranteed.
